DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a sample collection device, classified in class 73, subclass 864.31.
 - II. Claims 10-21, drawn to a device for collecting samples, classified in class 422, subclass 100.
 - III. Claim 22, drawn to a method of collecting samples, classified in class 436, subclass 180.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as, a method which utilizes a UV lamp and sterile air.

This relationship is applicable to Groups III and I.
4. The inventions as presently claimed in Group I and Group II are deemed to be independent inventions. The plurality of receptacles feature of the claims of Group II are not required by the claims of Group I. Similarly, the receptacle holder and conveyor feature of the

claims of Group I is not required by the claims of Group II. None of the claims as presently written link together the inventions set forth in Group I to II.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one group is not required for the others, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Joe McKinney Muncy on October 17, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to P. Kathryn Bex whose telephone number is (703) 306-5697. The examiner can normally be reached on Mondays-Thursdays from 6:00 am to 3:30 pm EST.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
